Students are affected by alcohol and drug abuse in a variety of ways, and it can significantly interfere with the mission of this College. In addition to affecting the health and safety of students, faculty, staff and campus visitors, it also can exact tremendous costs in relationship to campus crime and its interference with the goals of learning. North Central State College is committed to providing a safe, healthy learning community for all of its members.

(1) Adverse Health Effects of Alcohol or Drug Abuse

Individuals who abuse alcohol or drugs may suffer from a number of health-related and other short and long-term medical, behavioral and social problems:

- (b) Long-term health consequences include loss of appetite, vitamin deficiencies, stomach ailments, digestive problems, skin problems, sexual impotence, obesity, heart and central nervous system damage, memory loss, physical dependence, and psychological disorders.
- (c) Abuse can also increase the risk of death from automobile crashes, injuries during recreation and work; higher likelihood of homicide and suicide, and harm to a fetus during pregnancy.
- (d) Alcohol and other drug abuse is associated with violent behavior toward others, and may lead to inappropriate risk taking which can result in injury or death, unplanned pregnancies, and sexually transmitted diseases--including infection with the AIDS virus.
